

Cabinet Door & Surface
Innovations
Manufactured by Formations & Multiwood

Near limitless possibilities of HPL Designs

Simply choose from any HPL colour and texture, that can be sourced by Formations then select your substrate option.

While we proudly partner with industry-leading Formica® brand as our primary supplier, our process is flexible - allowing us to work with a wide range of HPL Brands to suit your project needs.

APEX HPL Series products are supplied to you as pre-laminated panels or completed slab style cabinet doors.

***Other HPL brands available upon request**

Formations CUT & TAPE PROGRAM

Our HPL cabinet doors are produced using premium materials and machined with precision. Unique edgebanding technology delivers a seamless look while providing exceptional durability.

Step 1 Select your HPL

SELECT DESIRED HPL BRAND

- Select your pattern
- Select your texture
- Select 2 Sided pattern

*Option: 1 Sided using White HPL back

FENIX®

ARPA

HOMAPAL®

Step 2 Select your substrate

INDUSTRIAL GRADE PARTICLE BOARD CORE

Options:

- Thickness: 19mm, 16mm, 12mm
- NAF (No Added Formaldehyde)
- ULEF (Ultra Low Emission Formaldehyde)
- Fire Rated

MDF CORE

Options:

- Thickness: 19mm, 16mm, 12mm
- NAF (No Added Formaldehyde)
- MR50 (Moisture Rated MDF)

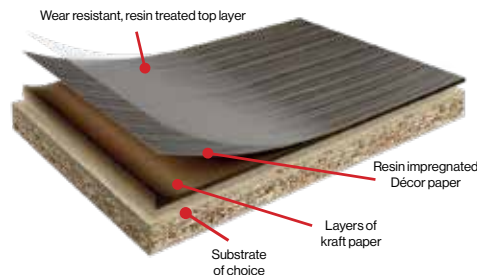

COMBINATION CORE

Outer layers consist of HDF, inner plies of Veneer Core

Options:

- Thickness: 19mm, 12mm
- NAUF (No Added Urea Formaldehyde)

BALTIC PLYWOOD CORE

Inner plies consist of Birch Veneer Core

Options:

- Thickness: 19mm, 16mm, 12mm
- NAUF (No Added Urea Formaldehyde)

Step 3 Order your panels or cabinet doors

*All HPL panels and Doors must be balanced with HPL on both sides to minimize warpage

Any décor panel stocked at Formations can be transformed through our Cut & Tape Program.

SLIM SHAKER 3/4"

COPE & STICK 3/4"

MITRE SHAKER 2 1/4"

SLAB 3/4"

How we build our door matters.

LM16 Slim Shaker Model

Engineered with true flat-back construction, our Slim Shaker doors outperform typical side-mounted moulding designs — offering enhanced stability and crisp, flawless mitre joints that stand the test of time.

Cope & Stick Shaker (90° assembly)

By leveraging a fully wrapped moulding profile instead of cut-and-edgebanded TFL or Polymer components, our process significantly minimizes edgetape usage while improving overall finish consistency.

Mitre Shaker (45° assembly)

Built using fully wrapped moulding profiles and integrated centre panels, our traditional Mitre Shaker doors set the standard for quality in 5-piece cabinet door construction.

Slab

Our Slab construction method produces an ultra-clean, contemporary cabinet door, available in a wide range of designs and precision edge-banded for a seamless appearance.

**Our Multiwood 5-Piece
Component & Slab
doors are available in
select Lifestyle, ONbord
& Arauco* designs.**

arauco
PRISM

Arauco Design Options available in Multiwood 5-Piece Component & Slab Doors

Multiwood's Arauco solid colour 5-piece doors are "close matches to Arauco Prism TFL designs".

Multiwood produces these solid colour doors using components made of Polymer technology to achieve the Supermatt, Anti-fingerprint finish desired on cabinet doors.

Exact match polymer panels are available from Formations (Onbord), as well as the original Arauco Prism velvet finish TFL panels.
